

XSites IDX

MLS listings generate more website traffic and leads

Easy, intelligent searching with no “technicalities”

- Equipped with a simple, “one question” search screen

Consumers love the simplicity and not having to check numerous “boxes” to view listings

- Changes to search criteria update results immediately
- All listings are professionally displayed for each and every search result
- Works with any website or blog
- Listings are surrounded by your website brand at all times

View exact location of properties with location maps - you can even select pinpoints to see a property overview

- Interactive mapping features switch from aerial, road and bird’s eye views
- E-mail listing details to yourself, family members or friends
- Print listing details including photos, maps and property descriptions
- Property details are shown by scrolling over a property pin point or clicking on any one of the property listings
- Location possibilities are automatically populated upon typing
- Interactive real-time “slide bar” search provides instant results, no reloading
- Search results even include mis-keyed MLS listings

Create more relevant searches

- Choose the Most Viewed, your Agent Listings, Office Listings or create your own custom “Featured Listing” defaults from your saved searches

Featured listings are beautifully displayed with a brief overview of property details

- Unlimited saved search capabilities
- Automatic local adaptation means visitors in Miami see oceanfront search options, but not in Dallas
- Create a pre-defined custom search or save search criteria specific to your specialty

Draw over the area you specialize in to create your own pre-defined search.

- Visitors can perform a “quick search” from any page on your website

Lead capture and reporting

- Enticing lead capture forms, like “Schedule and Appointment” display on every listing
- Automatically creates “IDX leads” contact groups (in XSites) for follow up marketing
- Leads are delivered instantly to your mobile phone
- Customized e-mail follow up
- Agent contact information is featured with every listing detail and e-mail

Clients can store their favorite searches, listings and even have new listings automatically delivered to them via e-mail alerts

- “Property Binder” keeps client property preferences stored on your site keeping them coming back and engaged until it’s time to purchase

Data feed and security

- Import listings from your MLS directly to your XSite - no retyping
- Data is supported by the Real Estate Transaction Standard (RETS)
- Listings are updated daily so the most recent information is always available for clients to search
- Under no circumstances does a la mode, sell, convey, share or disseminate in any way, any data associated with MLS feeds
- a la mode will work with your MLS to ensure your website and data feed are in compliance with MLS Rules & Regulations information

Support, service, and training

- 24 x 7 x 365 live tech support based in Oklahoma City, Oklahoma dedicated to get you up and running immediately
- Pre-recorded webinars so you can watch and learn at your convenience
- Live, interactive webinars allow for hands on help and real time Q&A
- Short, topical tips and tricks are always updated at alamode.com
- Dedicated, on-site, secure servers monitored 24 x 7 x 365 for maximum security and performance
