

InterFlood

Real stories

"I tell every appraiser (and a few other professionals) I know that InterFlood is the best way to get flood maps. It's worth the money ..."

— Lester Harlow
Eastex Appraisal

"InterFlood is a simple download. Just click place in report and it provides a more professional, credible report. The client can verify the flood map number by actually viewing the map. It's a great product."

— Scott Abrahamson
All Points Appraisal

"I like the maps. It's a quick response when I request them from a la mode, and I include a copy of the flood map with each of my appraisal reports. InterFlood helps present a professional report, and I do not get any questions that the info is incorrect."

— Jim Riker
Appraisal Associates

"Prior to InterFlood we used a cut-and-paste approach and each flood map was an art project. So each appraisal had a 'template,' which was the heading sheet with the address, name of client, and the general heading flood map. We then copied the FIRM map, cut out the section we needed, glued the flood map onto the header, stuck it into the copier to get the page that we would insert into the appraisal, and then used a rub off arrow to indicate where the subject was. It was time consuming."

"With Interflood we hit a button and presto ... an accurate, professional addition to each appraisal. It's well worth the cost both in time savings and overall appearance."

— Valerie Chase
Ashley, Scarborough &
Pierce Appraisal Service

"InterFlood is an accurate and very quick method of retrieving flood data and maps. ... And, I've never had someone come back to me claiming the flood data was incorrect."

— Stacey Gaba Wade
Charles Gaba Appraisals

"I tell every appraiser (and a few other professionals) I know that InterFlood is the best way to get flood maps. It's worth the money. And it works so well with my a la mode software."
