

# Appraisal issues? Solved.

Whether you're a wholesale mortgage lender, retail loan officer, a top tier regional, or community bank, our Mercury Network system is the solution to your appraisal management needs.

Using cutting edge technology and innovative workflow tools, Mercury Network eliminates delays and information bottlenecks, without an AMC. Everyone stays in the loop, on point, and happy.

It scales instantly from a few appraisals to hundreds of thousands. You also always get 24 x 7 status, automated review rules, and a PDF plus full XML data — critical to meeting the looming GSE XML deadline. And it's of course 100% compliant with all the GLB, FHA, HVCC, USPAP, and Fed rules.

But perhaps best of all, it's free, fast, and secure. You simply can't lose. Try it today.

## Mercury Network Vendor Management Platform

We've delivered more appraisals than any other company, period. Here's why.

- Use your appraisers, or augment with ours — we cover every county in the U.S.
- All appraisals are auto-reviewed for over 1000 items before being transmitted, reducing issues due to oversights
- Get a printable PDF, plus full data for any type of form in GSE-compatible XML
- Check the AVM and assessed values, market direction, and other key info with one click
- Compliance through blind communications plus Intelligent Selection System (ISS)
- Tie it in to your own back office systems using APIs, or just use it ad hoc on the web
- Benefit from the sharpest technology: Proximity selection, 24 x 7 status, appraiser mobile iPhone tools, and much more
